

Data Acquisition Terminal

IASO-W10B-N6210

 10.1" medical panel PC with
Intel® Celeron® Processor

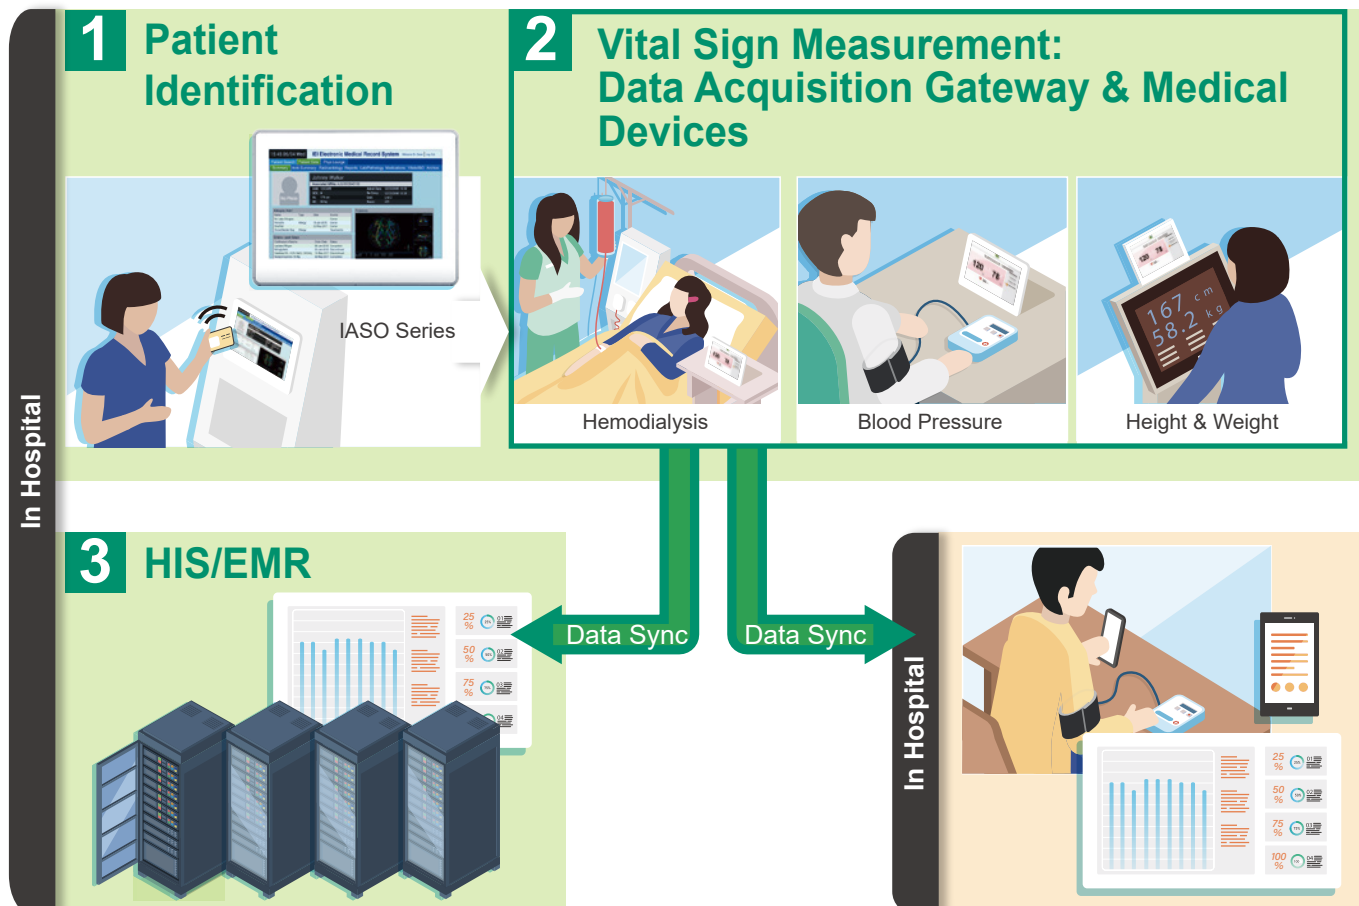

Features

- Intel® Celeron® Processor N6210
- Programmable LED light bar on both side
- 10-point PCAP touch with optical bonding
- IEEE 802.3 PoE (optional)
- RFID (NFC) reader (optional)

» Medical Data Acquisition

IEI helps to combine the data obtained at home with the medical records at the hospital so that medical personnels can observe the patient's measurement information thoroughly. The data can also be digitalized to effectively help data integration and tracking. In addition to synchronizing with the data in the hospital, if the patient is hospitalized, the data can also be saved in the system. These data can be kept intact and effectively used as an evaluation basis for diagnosis and treatment.

» LED Light Bars on Both Sides

Bright and simple outlook with programmable LED lights on both sides. Each light bar has 10 programmable RGB LEDs with IEC62471 certification. The colorful light and display can be adjusted according to use conditions. It can be used to detect the status light signal, or to warn the ward aisle. The front frame is made of translucent material to make the frame light and thin.

Each light bar has 10 programmable RGB LEDs

» Color Codes for Safety Signs

- IEC60601-1-8: General requirements, tests and guidance for alarm systems in medical electrical equipment and medical electrical systems.
- ANSI Z535.1-2017: A standard that describes the color codes that can be used on accident prevention signs, labels, and tags. This also includes the marking and location of first aid equipment, fire extinguishers, trip/slip hazards, and other potential hazards or safety equipment.

| | IEC60601-1-8 | | ANSI Z535.1-2017 |
|---|--|---|--|
| ■ Red | Flashing | High priority alarm condition: Immediate action to prevent injury. | Fire protection equipment and apparatus, danger signs, containers of flammable liquids, lights at barricades, stop button/switches. (PMS 186) |
| | Not flashing | Warning: Avoidance of a HAZARDOUS SITUATION which could cause death or serious injury. | |
| ■ Yellow | Flashing | Medium priority alarm condition: Prompt action to prevent injury. | Specific physical hazards (including falling, tripping and striking) and designating caution (including cabinets, cans and containers for explosives, corrosives or unstable materials). (PMS 109) |
| | Not flashing | Caution: Avoidance of a HAZARDOUS SITUATION which could cause minor or moderate injury or equipment damage. | |
| ■ Green | Ready for use | | Safety information and first aid or safety equipment. (PMS 335) |
| ■ Orange | The significance of these colors may be defined by the end-user. | | Signs and equipment designating dangerous or energized machines/equipment. (PMS 151) |
| ■ Blue | The significance of these colors may be defined by the end-user. | | Information not immediately safety-related (i.e. property policies including safety gear requirements). (PMS 285) |
| ■ Purple | The significance of these colors may be defined by the end-user. | | The significance of purple may be defined by the end-user, but purple (or the combination of purple and yellow) has become the de facto standard for radiation hazards. (PMS 259) |
| ■ Gray Black, white or any combo of these and/ or Yellow | The significance of these colors may be defined by the end-user. | | The significance of these colors may be defined by the end-user. |
